# JOHN MELODY ME CHENG TZE KEONG

SENIOR SOFTWARE ENGINEER

## DETAILS

**PHONE**
+60137397193

**EMAIL**
johnmelodyme@icloud.com

## SKILLS

Node.js

MongoDB

C#

Docker

MySQL

Python

JavaScript

SQL

Git

Java

Docker

Python

JavaScript

Java

Flutter

Swift

Tensorflow

PyTorch

Arduino

## LANGUAGES

English

Malay

Tamil

## PROFILE

I built various categories of applications. In my career, I have created 15 super applications for different natures of business, whether it is finances or the Internet of things. The application I will be provided on this platform will be as follows:

- Flutter
- Android Application
- Back-end System
- SQL / NON RELATIONAL DB
- Debugging and Bug fixes.

## EMPLOYMENT HISTORY

### Mobile Application Developer, Sleekflow

Aug 2022 — Present

- Clearly and regularly communicate with management and technical support colleagues
- Design and update software database. This includes, but is not limited to: Software Applications, Websites, Data Communication Processes and User Interfaces
- Test, maintain and recommend software improvements to ensure strong functionality and optimization.
- Develop, test and implement new software programs.

In charge of implementing new features and bug fixes for the E-Commerce application of both IOS and android.

Tech stacks: WhatsApp API, Stripe, Flutter, Gradle, Swift (Programming Language), Sleekflow Omni Channel Social Commerce Platform, React Native, Android, IOS and Kotlin.

### SENIOR SOFTWARE ENGINEER , Grind Reel

Sep 2021 — Dec 2021

- Design and update software database. This includes, but is not limited to: Software Applications, Websites, Data Communication Processes and User Interfaces
- Test, maintain and recommend software improvements to ensure strong functionality and optimization.
- Develop, test and implement new software programs.

In charge of creating educational web applications, mobile applications and machine learning applications (specifically NLP, and computer vision).

Tech stacks: Redis, ExpressJS, VueJs, Stripe, MongoDB, Tensorflow, Pytorch, Python, Swift, Flutter, Vapor Swift, Solidity and MetaMaskAPI.- Clearly and regularly communicate with management and technical support colleagues - Design and update software database. This includes, but is not limited to: Software Applications, Websites, Data Communication Processes and User Interfaces - Test, maintain

and recommend software improvements to ensure strong functionality and optimization. - Develop, test and implement new software programs. In charge of creating educational web applications, mobile applications and machine learning applications (specifically NLP, and computer vision). Tech stacks: Redis, ExpressJS, VueJs, Stripe, MongoDB, Tensorflow, Pytorch, Python, Swift, Flutter, Vapor Swift, Solidity and MetaMaskAPI.

- **Skills:** Flutter · Node.js · Stripe · React Native · Jitsi · Amplitude Analytics · Microsoft Azure · OpenCV · MongoDB · Figma (Software) · Python · Java · Computer Science · Programming · Algorithms · SQL · C++ · MySQL · Firebase · Haskell · Programming Languages · Natural Language Processing (NLP) · Android · Git · Kotlin

### Software Engineer, Mynapse (m) Sdn Bhd

Apr 2020 — Jun 2021

- Develop, test and implement new software programs
- Clearly and regularly communicate with management and technical support colleagues
- Design and update software database. This includes, but is not limited to: Software Applications, Websites, Data Communication Processes and User Interfaces
- Test, maintain and recommend software improvements to ensure strong functionality and optimization
- Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions. Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code.

In charge of developing SMS services, Video calls application with WebRTC and SIP protocol and custom Encryption with Extended Diffie-Hellman for Social Media application (IOS and Android) named "Monjo".

Tech Stacks: Kotlin, Java, Elixir, Erlang, CouchDB, Flutter, Objective-C and Swift.- Develop, test and implement new software programs - Clearly and regularly communicate with management and technical support colleagues - Design and update software database. This includes, but is not limited to: Software Applications, Websites, Data Communication Processes and User Interfaces - Test, maintain and recommend software improvements to ensure strong functionality and optimization - Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions. Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code. ### Armed Security Personnel , G4S

Jun 2014 — Nov 2017

- Working as a direct representative of the G4s management in the administration of the facility security program.
- Protecting all public/private property within the G4s contract guard jurisdiction including material, equipment, supplies, and buildings from fire, accident, theft, sabotage, and trespass.
- Safeguarding and protecting all government information, documents, and equipment entrusted to the care of the G4s contract guards.
- Responsible to the extent prescribed by established post orders, policies and procedures, operate, maintain and enforce a system of personnel identification and access controls for facility employees and visitors.
- Consistent with authority, apprehending and detaining all suspicious person(s) or any who attempt to gain access to the facility, for release to local law enforcement authorities.
- Maintaining law and order and preventing illegal acts within the G4scontract guard jurisdiction, may jeopardize the safety or security of the facility and its personnel.
- Provide, in writing, any security deficiencies and report them in a timely manner to the facility security coordinator.
- Enforcing all facility rules governing control of all vehicular and personnel traffic entering the facility.
- Licensed to carry weapons, while performing surveilling, patrolling, maintaining peace and order and ensuring the safety of lives and property.- Working as a direct representative of the G4s management in the administration of the facility security program. - Protecting all public/private property within the G4s contract guard jurisdiction including material, equipment, supplies, and buildings from fire, accident, theft, sabotage, and trespass. - Safeguarding and protecting all government information, documents, and equipment entrusted to the care of the G4s contract guards. - Responsible to the extent prescribed by established post orders, policies and procedures, operate, maintain and enforce a system of personnel identification and access controls for facility employees and visitors. - Consistent with authority, apprehending and detaining all suspicious person(s) or any who attempt to gain access to the facility, for release to local law enforcement authorities. - Maintaining law and order and preventing illegal acts within the G4s contract guard jurisdiction, may jeopardize the safety or security of the facility and

its personnel. - Provide, in writing, any security deficiencies and report them in a timely manner to the facility security coordinator. - Enforcing all facility rules governing control of all vehicular and personnel traffic entering the facility. - Licensed to carry weapons, while performing surveilling, patrolling, maintaining peace and order and ensuring the safety of lives and property.

**Skills:** Firearms Handling · Tactical Operations

## EDUCATION

**SPM, SMK HAMID KHAN**
Jan 2009 — Dec 2013

## COURSES

**Structure Software Testing, Swift Software ltd**

**Introduction to CyberSecurity, CISCO**

**AWS Serverless Analytic, AWS**

**Mathematics for Machine Learning, AWS**

**Demystifying AI/ML/DL, AWS**

**Data Analysis Fundamentals, AWS**

**Security of Nuclear Information, International Atomic Energy Agency (IAEA)**
